

Plasterboard in. Everything else out.

Goes in

Plasterboard offcuts and part sheets

Whole sheets, damaged or surplus

Standard, fire-rated and moisture-resistant board

Plaster cornice

Board from walls and ceilings — clean, and you're sure it isn't fibro

Pull out screws, nails and timber. Shut the panels when you're done.

Stays out

Fibro, or any sheet that might contain asbestos

Foil-backed board, insulation-bonded board

Board with lead paint

Tiles, timber, metal, insulation batts, plastic wrap

Concrete, bricks, soil, general rubbish

Liquids, paint tins, hazardous waste

Not sure? It stays out. Ask the gate.

One sheet of fibro contaminates the whole bin.

**This bin is collected and recycled by
Plastercycle.**
